PREPARATION

- Remove the retractable cargo cover; it may be replaced later.
- Unfold the Hatchbag and place in the vehicle so that the base fits snugly in position. The panel with the Hatchbag label sits against the back of the rear seat.

VERY IMPORTANT PREPARATION

To ensure a good bond, when using the self-adhesive hook & loop fasteners to attach the Boot liner to the plastic / metal trim (**Not** the carpet); it is most important to remove silicone film from the vehicle trim. Silicone is applied during manufacture and can also be found in many detailing products. It is **highly likely there will be a build-up of silicone**. Before applying any hook & loop fastener pads, the surface **MUST be thoroughly** cleaned using a silicone remover. (The hook & loop fasteners cannot be used once it has been in contact with silicone). We recommend Intensive Tar Remover made by AutoGlym. Wipe off thoroughly **any residue with a separate clean dry cloth**.

NOTE: the adhesive takes 24hrs to reach full adhesion, do not disturb during.
