VERY IMPORTANT PREPARATION

To ensure the self-adhesive hook & loop fastener stick to the plastic trim, you **MUST CLEAN** all grime from the plastic and **REMOVE** all **SILICONE** applied during manufacture and valeting.

To do this please:

1. Use a silicone remover, such as AutoGlym Intensive Tar Remover, and apply generously to the surface you want to adhere to.
2. Using a separate clean, dry cloth, thoroughly dry the surface until the cloth starts to drag. Attach one self-adhesive fastener tab to see if it sticks. (Repeat steps 1 and 2 if necessary.) Extra tabs have been provided.
3. Attach the self-adhesive fasteners and let them fully adhere over the next 24 hours for the best bond.

**The self-adhesive fasteners cannot be used once they have been in contact with silicone. Replacement kits are available on our website.*

STEP 2. INSTALLING THE BASE

- Place the cargo liner into the cargo area with the Hatchbag logo at the seat end. Flatten the base so it fits snugly against the edges. The hook fasteners on the underside attach directly to the carpet. (Image B)

STEP 3. INSTALLING THE FRONT

- **PLUS / SPLIT VERSION ONLY** - Fasten the hook & loop fasteners between the side panels and the seat panel. (Image C)
- Starting with the middle headrest, fasten the hook & loop fastener straps around both headrest posts. (Image D). Make sure to hold the front part of the base in position to avoid pulling the cargo liner too far up. Repeat the procedure with the left and right headrests.

REAR PLUS VERSIONS

You **MUST** unfasten the hook & loop fasteners and the headrest straps before you recline the upper part of the rear seats. (Please refer to **REAR PLUS / SPLIT** options on website to see detailed photo.)

STEP 4. INSTALLING THE SIDES

- On the right hand side of the cargo area stick the following loop fasteners in line with the hook fasteners sewn & welded on the reverse side of the cargo liner as highlighted on **Image E**.
 - Orange 330 mm loop fastener

 - Yellow 130 mm loop fastener
- On the left hand side of the cargo area stick the following loop fasteners in line with the hook fasteners sewn & welded on the reverse side of the cargo liner as highlighted on **Image F**.
 - Green 420 mm loop fastener
 - Yellow 130 mm loop fastener
- If necessary snip the self-adhesive fastener strips at the corners to ease around the curves.
- Fasten the hook fastener sewn onto the top and back edge on both sides of the cargo liner directly onto the previously attached loop fasteners. (**Image G**)

STEP 5. INSTALLING THE BACK

- On both sides stick 2 x 360mm loop fastener to the liftgate edge of the cargo area starting from the lock in the middle and running along the and then up along the sides (**Image H**).

- The Bumper Flap either folds into the vehicle OR can be detached and stored elsewhere when you close the liftgate.

STEP 6D. CARGO LINER EXTENSION

The Cargo liner extension provides superior protection for the rear seats when purchased with a REAR PLUS option.

- The Cargo liner extension is designed to attach to a Rear Plus/Split version liner.

- It does not offer full protection to the rear doors
- Attach the Cargo liner extension to the main cargo liner (Image 3)
- Fasten the two ties in the corner together (Orange arrows - Image 4)
