VERY IMPORTANT PREPARATION

To ensure the self-adhesive hook & loop fastener stick to the plastic trim, you MUST CLEAN all grime from the plastic and REMOVE all SILICONE applied during manufacture and detailing.

To do this please:

1. Use a silicone remover, such as AutoGlym Intensive Tar Remover, and apply generously to the surface you want to adhere to.
2. Using a separate clean, dry cloth, thoroughly dry the surface until the cloth starts to drag. Attach one self-adhesive fastener tab to see if it sticks. (Repeat steps 1 and 2 if necessary.) Extra tabs have been provided.
3. Attach the self-adhesive fasteners and let them fully adhere over the next 24 hours for the best bond.

**The self-adhesive fasteners cannot be used once they have been in contact with silicone. Replacement kits are available on our website.*

- PLUS / SPLIT VERSION ONLY - Fasten the hook & loop fasteners between the side panels and the seat panel. (Image C)
- Starting with the middle headrest, fasten the hook & loop fastener straps around both headrest posts. (Image D). Make sure to hold the front part of the base in position to avoid pulling the cargo liner too far up. Repeat the procedure with the left and right headrests.

- Slide these fastener tabs up or down so that they align with the hook fastener welded onto the rear sides of the cargo liner. (Image F - see blue highlights)

  - Green *560 mm loop fastener*
  - Orange 6 x tabs self-adhesive loop fastener

- If necessary snip the self-adhesive fastener strips at the corners to ease around the curves.

- Fasten the hook fastener sewn onto the top and back edge on both sides of the cargo liner directly onto the previously attached loop fasteners. (Image H)

STEP 5. INSTALLING THE BACK

- Stick the 2 x 430mm to the plastic panel located at the Liftgate end of the side of the cargo area, aligned with the hook fastener on the back of the cargo liner. (Image I - highlighted in orange)
